ABOUT TRAINER

MISS SUNDAS SHAHID

Ms. Shahid is a certified Mental Maths trainer from Numerica UK and has been in the field of training for the past 12 years. She is also a certified Master Trainer from UNDP and Asian Development Bank. She has given interactive training sessions in various organizations including Shifa International Hospital and Quaid-e-Azam International Hospital.

ABOUT NUMERICA

Numerica is a long-term academic enrichment program engineered to help students build a solid foundation. At Numerica, we believe that every child is a genius and can excel academically if they are provided with relevant academic direction at the right time in the correct way. The focus of Numerica program is to unlock the potential of every student through daily practice and a commitment to achieve long-term success.

OUR METHODS of COACHING

a

CORE PROGRAMS

Japanese Mental Math
British English Coaching

For both programs, Numerica works by giving an initial assessment to a student for judging his/her current skill level. Based on the results of this assessment as well as the student's study skills, a Numerica instructor creates an individualized study plan for each student.

b

STEP BY STEP LEARNING

Each student incrementally builds on the knowledge and learning from previous sessions. This enables them to move between familiar and new topics smoothly and allows them to apply their knowledge to solve increasingly complex problems.

c

STUDY PLAN

Every study session is timed, marked and recorded to track progress and to assist the trainer when planning a student's work plan.

d

LONG-TERM REIMBURSEMENTS

Numerica encourages students to develop skills such as persistence, diligence and effective time management while building self-esteem and confidence along the way.

e

BUILDING INTRINSIC MOTIVATION

This program works to build a sense of self-motivation through focus on independent-study and self-learning which builds confidence in students and encourages them to learn more.

PARENTS' OPINIONS

The Numerica worksheets have proven to be the key to my child's success in school assignments.

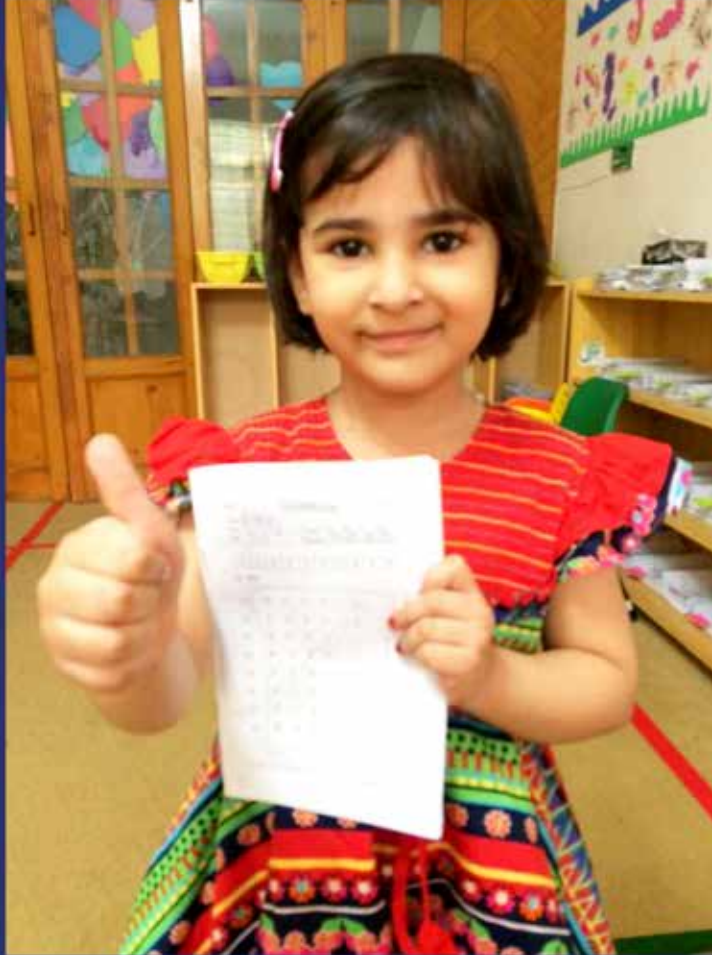

At school, teachers move on regardless of whether each student has fully grasped a lesson or not. Numerica ensures that my child has truly absorbed each new idea before progressing to the next one.

Instead of taking notes, memorizing facts and being fed information from teachers or a tutor, my child has actively developed critical, self-learning skills at Numerica.

One common benefit shared by my child is the ease and accuracy with which he completes school assignments.

Not only does daily practice helped my child advance academically, but it also improved her time management skills and concentration.
